

OCCUPATIONAL HEALTH & SAFETY POLICY

In order to meet all Occupational Health, Safety and Welfare requirements; Advanced Biomedical has implemented an integrated management system that incorporates all OH & S criteria that must be conformed to.

SafetyMAP and AS 4801 have been used as guides. Accordingly our system procedures and Standard Operating Procedures (SOP's) include requirements to minimise or eliminate any unsafe practices and their effects that may have a detrimental effect.

The OH&S has the authority and responsibility to ensure that we meet all OH & S regulations.

To ensure suitability and improvement in our systems, conformance to safe work practices is included in our audit program.

We encourage all staff to support us in this regard.
